

Antigua and Barbuda CONSUMER PRICE INDEX

Release date: 28 Jun 2017

May 2017 Inflation Rate 3%

Headline Inflation: Year-on-Year Changes for May 2017 compared to May 2016

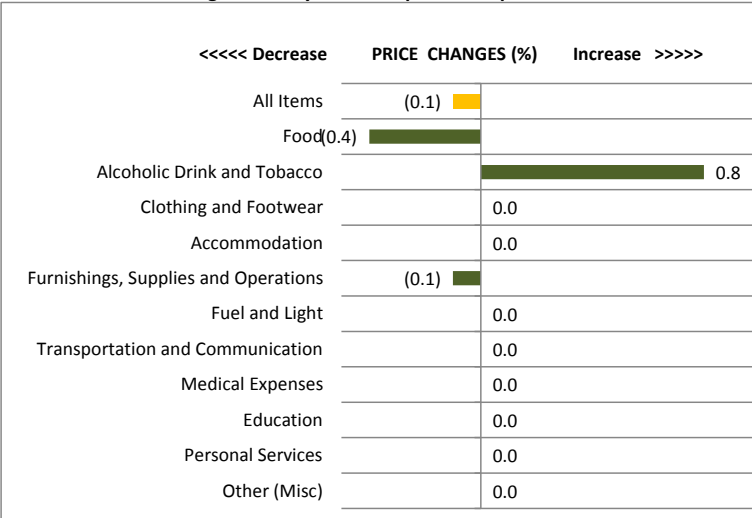

In May 2017, the annual rate for Consumer Prices increased 3.0%. Increases in the indexes for Food, Alcoholic Beverages, Accommodation, Transportation and Communication, Personal Services and Other (Miscellaneous) all contributed to the increase in the All Items Index.

Over the last twelve months the Food Index rose 2.2%. The Index for Food Not Elsewhere Specified (Food N.E.S) increased 6.5%. The Index for Sugar, Jams Confectionery rose 4.3% and the Index for Fruits and Vegetables increased 9.6%. The Index for Fats and Oils rose 1.4%. However, the Index for Dairy Products decreased by 6.5% mostly due to a sharp decrease in the Index for Milk.

The All Items Less Food and Energy Index increased 2.4% over the past twelve months. The Accommodation Index remains at 7.4%. The Index for Transportation and Communication increased by 4.0% with the Index for Transport Services increasing by 3.1%. Changes in the Indexes for Personal Effects, Alcoholic Drink and Tobacco, Furnishings, Supplies and Operations and Other (Miscellaneous) contributed to the increase.

The Energy Index has remained unchanged at 0.0%. The Indexes for Gasoline at the Pump, Electricity and Cooking Gas were unchanged.

Month-to-Month Changes for May 2017 compared to Apr 2017

The Consumer Price Index decreased 0.1% for the month ending May 2017.

The Food Index decreased by 0.4% as seven of the nine major food groups indexes decreased. The Indexes for Sugar, Jams, Confectionery and Food Not Elsewhere Specified (Food N.E.S) had decreases of 3.3% and 1.7% respectively. The Indexes for Fats and Oils, Bakery and Cereal Products, Meats, Fruits and Vegetables all had marginal decreases. The Index for Fruits and Vegetables increased 1.2% and the Index for Hot Beverages increased by 0.7%

The Index for Alcoholic Drink and Tobacco rose 0.8% resulting from a 0.9% increase in the Index for Alcoholic Beverages.

The Energy Index has remained unchanged at 0.0%. The Indexes for Gasoline at the Pump, Electricity and Cooking Gas were unchanged.

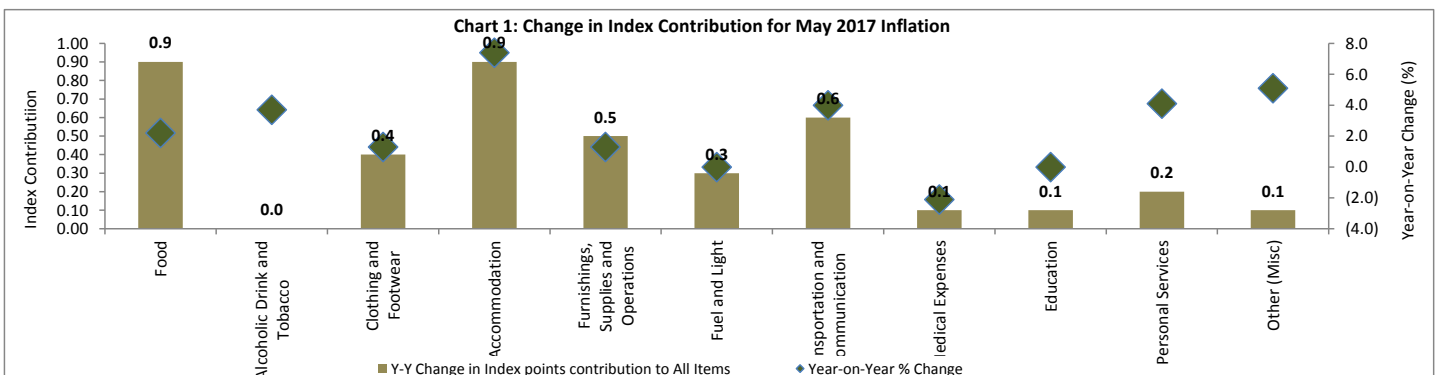

Table 1: Examples of Goods and Services in the 2001-based Consumer Shopping Basket

Main Expenditure Categories	No. of Items	Example of Goods and Services for which prices are collected to calculate the inflation rate	Frequency of price collection
Food	173	<i>Breakfast cereal, milk, coffee, juices, chicken, wine, vegetables, fruits, full-service meals, snacks</i>	Monthly
Alcoholic Drink and Tobacco	12	<i>Beer, stout, rum, whisky</i>	Monthly
Clothing and Footwear	65	<i>Men's pants, boys shorts, women's dresses, brassieres, underwear, infant's disposable diapers, watches, rings, bags</i>	Quarterly
Accommodation	10	<i>Rent paid, repairs and maintenance, property taxes, mortgage payments</i>	Quarterly
Furnishings, Supplies and Operations	74	<i>Sofas, mattress, kitchen cabinets, dressing table, rugs, linoleum, curtains, glassware; hourly wage rate</i>	Quarterly
Fuel and Light	2	<i>Electricity, LPG cooking gas</i>	Monthly
Transportation and Communication	27	<i>cellular phones, cars, license, gasoline, insurance, driving permit</i>	Quarterly
Medical Expenses	16	<i>doctor's bill, hospital care room rate, medicine</i>	Quarterly
Education	8	<i>Tuition fees, books, school supplies, exam fees</i>	Quarterly
Personal Services	10	<i>Hair cut, pedicure, manicure, driving lessons</i>	Quarterly
Other (Misc)	45	<i>Body lotion, toothpaste, shampoo, carnival costumes, gym membership</i>	Monthly, Quarterly
Total number of goods and services in the basket	442	Prices are collected from the second Monday to the second Thursday of every month	

¹ Outlets refer to the businesses where prices are collected (e.g supermarkets). The same outlets are used for Food, Alcoholic Drink & Tobacco, and some Other (Misc) items

What is the Consumer Price Index?

The Consumer Price Index (CPI) is a statistical indicator of changes in the general level of prices of consumer goods and services purchased by private households. The CPI measures price movements of a fixed quality and quantity of goods and services. The mix of these consumer goods and services comprising the CPI are referred to as a "shopping basket." In constructing this "shopping basket", the selected goods and services are organised first by commodity type. They are then divided into sections, then sub-groups and then assigned to a major expenditure category. The Antigua and Barbuda CPI has 26 sections, 30 sub-groups and 11 major categories.

What is the Base Period?

The base period (base year) is the time period that is used as a reference point for measuring the price change of goods and services. The base period for the Antigua and Barbuda CPI is January 2001.

The base period index is represented as 100.0. (Usually presented as 2001 = 100). So for instance, if the April 2010 CPI for chicken legs is 167.1, then it means that the price for chicken legs has gone up by 67.1% since 2001. Similarly, if the January 2010 CPI for bread is 93.1, then the price of bread has dropped by 6.9% compared to its price in 2001.

What is Inflation?

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given amount of money. There are three expressions of price changes:

- year-on-year (*the inflation rate*)
- month-to-month
- annual average (or annualised average)

The annual average CPI is derived by summing the CPI for each month of the year and dividing by 12.

What are Weights?

Weights can be considered in the same way we would express how much we spend on various goods and services each month. Just like a monthly salary can be broken down as 20% on rent, 25% food, 15% mortgage, 10% on utilities and so on, the CPI weights are a collective expression of how households would generally spend their monthly income on goods and services.

The weights for this series of CPI were drawn from a survey of a sample of households in 2001 (the base period). Each household was asked to keep a record of their expenditure for one month. Once completed, the expenditures were added to determine the pattern. This pattern is what is referred to as the weights.

The current weights assume that each month, households would spend the most on *Accommodation* (218.3) followed by *Food* (214.2) and *Transportation and Communication* (153.5). Households would also spend the least on *Alcoholic Drink and Tobacco* (1.6).

Index Points Contribution

Contribution of each expenditure category (category weight over All Items weight) to the All Items index points change.

$$\begin{aligned}
 \text{Year-on-Year Inflation} &= \frac{\text{June 2010 CPI} - \text{June 2009 CPI}}{\text{June 2009 CPI}} \times 100 \\
 \text{Month-to-Month Price Changes} &= \frac{\text{June 2010 CPI} - \text{May 2010 CPI}}{\text{May 2010 CPI}} \times 100 \\
 \text{Annualised Inflation Rate} &= \frac{\text{Average 2010 CPI} - \text{Average 2009 CPI}}{\text{Average 2009 CPI}} \times 100
 \end{aligned}$$

The compilation of the CPI and the calculation of the inflation rate involve the processing of hundreds of price quotations. The Statistics Division wishes to acknowledge the cooperation of the business community in supplying the required prices and accommodating the Statistical Officers on their premises. Price collection is authorised by the *General Statistics Act, No. 13 of 1975*.

Table 3: Distribution of Changes in the Inflation Rate

	No. of categories	No. of Decreases	No. of Increases	No. of No Changes
May 2017 compared to May 2016				
Main Expenditure Level	11	1	8	2
Sub Group Level	26	6	20	0
Section Level	30	8	16	6
Apr 2017 compared to Apr 2016				
Main Expenditure Category Level	11	1	8	2
Sub Group Level	26	6	19	1
Section Level	30	11	14	5
Mar 2017 compared to Mar 2016				
Main Expenditure Category Level	11	3	7	1
Sub Group Level	26	5	21	0
Section Level	30	11	19	0
May 2017 compared to Apr 2017				
Main Expenditure Category Level	11	2	1	8
Sub Group Level	26	8	3	15
Section Level	30	9	10	11

Table 3 outlines the distribution of price movements for four inflation periods:

May 2017 compared to May 2016
 Apr 2017 compared to Apr 2016
 Mar 2017 compared to Mar 2016
 May 2017 compared to Apr 2017

In May 2017 compared to May 2016, 1 of the 11 main expenditure categories recorded price decreases, while 8 recorded price increases. 20 of the 26 sub-group levels also recorded price increases for some of the items that fall in that level. These collective increases and decreases would account for the magnitude and direction of the current inflation rate. 2 of the 11 main expenditure categories recorded no price changes.
