

Antigua and Barbuda CONSUMER PRICE INDEX

Release date: 18 Nov 2016

Oct 2016 Inflation Rate **-1.1%**

Headline Inflation: Year-on-Year Changes for Oct 2016 compared to Oct 2015

In October 2016, the annual rate for Consumer Prices fell 1.1%. The adoption of the geometric mean is having a downward impact on measured inflation. The adaption which took effect in April 2016 will filter through the twelve months cycle.

The Medical Expenses and the Accommodation indexes have been impacted by the adoption of the implementation of the geometric mean. The indexes declined 6% and 4.1% respectively.

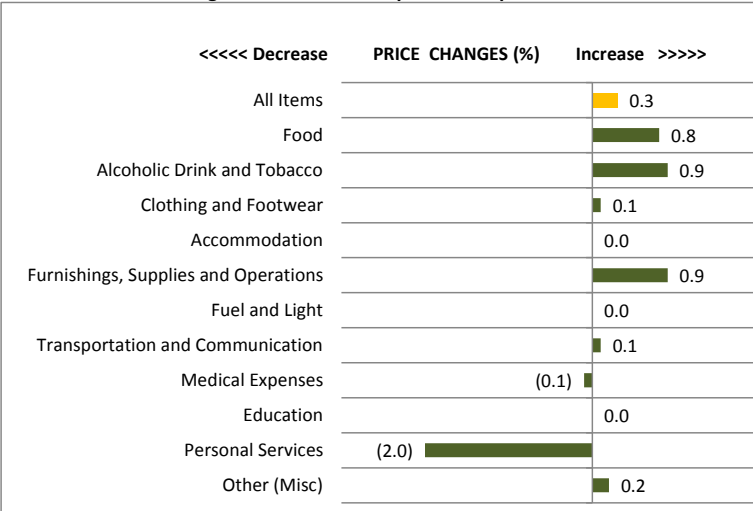

The Food Index increased 0.2% over the last twelve months. Increases in the Food Not Elsewhere Specified (Food N.E.S) and Dairy Products indexes were the main cause of the rise in the Food Index. The Food Not Elsewhere Specified (Food N.E.S) Index rose 3.6% with the Meals Out (food away from home) Index increasing 4.1%.

The Dairy Products Index increased 3.1%, this increase was influenced by average price increases in cheese and milk products.

The Energy Index has declined 1.9%. Gasoline at the pump is one of the three major energy components that has declined. The other two electricity and cooking gas has remained unchanged.

The All Items Less Food and Energy Index declined 0.8% over the past twelve months. The Index for Alcoholic Drink and Tobacco fell 2.8% and the Index for Transportation and Communication decreased by 0.2%.

Month-to-Month Changes for Oct 2016 compared to Sep 2016

The Consumer Price Index or All Items Index for the month ending October 2016 has increased by 0.3%. Six of eleven major groups contributed to this increase.

The Food Index increased 0.8% with the Indexes for Meats and Dairy Products been the primary factor for the increases. The Meat index increase by 2.0% and the Dairy Products rose 2.2%.

The Index for Furnishings, Supplies and Operations increased by 0.9%. Increases in the indexes for Household Utensils and Household Textiles and Furnishings were the main causes for the increase.

The Index for Alcoholic Drink and Tobacco is among the three major contributors to the increase in the All Items Index. The Index rose 0.9% increasing from 0.3% in September.

The Index for Personal Services and Medical Expenses both declined.

The Energy Index remained unchanged for eight consecutive months.

Table 1: Examples of Goods and Services in the 2001-based Consumer Shopping Basket

Main Expenditure Categories	No. of Items	Example of Goods and Services for which prices are collected to calculate the inflation rate	Frequency of price collection
Food	173	<i>Breakfast cereal, milk, coffee, juices, chicken, wine, vegetables, fruits, full-service meals, snacks</i>	Monthly
Alcoholic Drink and Tobacco	12	<i>Beer, stout, rum, whisky</i>	Monthly
Clothing and Footwear	65	<i>Men's pants, boys shorts, women's dresses, brassieres, underwear, infant's disposable diapers, watches, rings, bags</i>	Quarterly
Accommodation	10	<i>Rent paid, repairs and maintenance, property taxes, mortgage payments</i>	Quarterly
Furnishings, Supplies and Operations	74	<i>Sofas, mattress, kitchen cabinets, dressing table, rugs, linoleum, curtains, glassware; hourly wage rate</i>	Quarterly
Fuel and Light	2	<i>Electricity, LPG cooking gas</i>	Monthly
Transportation and Communication	27	<i>cellular phones, cars, license, gasoline, insurance, driving permit</i>	Quarterly
Medical Expenses	16	<i>doctor's bill, hospital care room rate, medicine</i>	Quarterly
Education	8	<i>Tuition fees, books, school supplies, exam fees</i>	Quarterly
Personal Services	10	<i>Hair cut, pedicure, manicure, driving lessons</i>	Quarterly
Other (Misc)	45	<i>Body lotion, toothpaste, shampoo, carnival costumes, gym membership</i>	Monthly, Quarterly
Total number of goods and services in the basket	442	Prices are collected from the second Monday to the second Thursday of every month	

¹ Outlets refer to the businesses where prices are collected (e.g supermarkets). The same outlets are used for Food, Alcoholic Drink & Tobacco, and some Other (Misc) items

What is the Consumer Price Index?

The Consumer Price Index (CPI) is a statistical indicator of changes in the general level of prices of consumer goods and services purchased by private households. The CPI measures price movements of a fixed quality and quantity of goods and services. The mix of these consumer goods and services comprising the CPI are referred to as a "shopping basket." In constructing this "shopping basket", the selected goods and services are organised first by commodity type. They are then divided into sections, then sub-groups and then assigned to a major expenditure category. The Antigua and Barbuda CPI has 26 sections, 30 sub-groups and 11 major categories.

What is the Base Period?

The base period (base year) is the time period that is used as a reference point for measuring the price change of goods and services. The base period for the Antigua and Barbuda CPI is January 2001.

The base period index is represented as 100.0. (Usually presented as 2001 = 100). So for instance, if the April 2010 CPI for chicken legs is 167.1, then it means that the price for chicken legs has gone up by 67.1% since 2001. Similarly, if the January 2010 CPI for bread is 93.1, then the price of bread has dropped by 6.9% compared to its price in 2001.

What is Inflation?

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given amount of money. There are three expressions of price changes:

- year-on-year (*the inflation rate*)
- month-to-month
- annual average (or annualised average)

The annual average CPI is derived by summing the CPI for each month of the year and dividing by 12.

What are Weights?

Weights can be considered in the same way we would express how much we spend on various goods and services each month. Just like a monthly salary can be broken down as 20% on rent, 25% food, 15% mortgage, 10% on utilities and so on, the CPI weights are a collective expression of how households would generally spend their monthly income on goods and services.

The weights for this series of CPI were drawn from a survey of a sample of households in 2001 (the base period). Each household was asked to keep a record of their expenditure for one month. Once completed, the expenditures were added to determine the pattern. This pattern is what is referred to as the weights.

The current weights assume that each month, households would spend the most on *Accommodation* (218.3) followed by *Food* (214.2) and *Transportation and Communication* (153.5). Households would also spend the least on *Alcoholic Drink and Tobacco* (1.6).

Index Points Contribution

Contribution of each expenditure category (category weight over All Items weight) to the All Items index points change.

Year-on-Year Inflation	$\frac{\text{June 2010 CPI} - \text{June 2009 CPI}}{\text{June 2009 CPI}} \times 100$
Month-to-Month Price Changes	$\frac{\text{June 2010 CPI} - \text{May 2010 CPI}}{\text{May 2010 CPI}} \times 100$
Annualised Inflation Rate	$\frac{\text{Average 2010 CPI} - \text{Average 2009 CPI}}{\text{Average 2009 CPI}} \times 100$

The compilation of the CPI and the calculation of the inflation rate involve the processing of hundreds of price quotations. The Statistics Division wishes to acknowledge the cooperation of the business community in supplying the required prices and accommodating the Statistical Officers on their premises. Price collection is authorised by the *General Statistics Act, No. 13 of 1975*.

	All Items less Food	127.79	127.69	129.81	(1.6)	0.1
	All Items LESS Energy	133.56	133.18	134.25	(0.5)	0.3
	All Items less Food and Energy	126.26	126.16	127.26	(0.8)	0.1

Table 3: Distribution of Changes in the Inflation Rate

	No. of categories	No. of Decreases	No. of Increases	No. of No Changes
Oct 2016 compared to Oct 2015				
Main Expenditure Level	11	5	5	1
Sub Group Level	26	14	12	0
Section Level	30	17	13	0
Sep 2016 compared to Sep 2015				
Main Expenditure Category Level	11	6	4	1
Sub Group Level	26	14	12	0
Section Level	30	15	15	0
Aug 2016 compared to Aug 2015				
Main Expenditure Category Level	11	5	5	1
Sub Group Level	26	14	12	0
Section Level	30	16	14	0
Oct 2016 compared to Sep 2016				
Main Expenditure Category Level	11	2	6	3
Sub Group Level	26	5	15	6
Section Level	30	5	14	11

Table 3 outlines the distribution of price movements for four inflation periods:

- Oct 2016 compared to Oct 2015
- Sep 2016 compared to Sep 2015
- Aug 2016 compared to Aug 2015
- Oct 2016 compared to Sep 2016

In Oct 2016 compared to Oct 2015, 5 of the 11 main expenditure categories recorded price decreases, while 5 recorded price increases. 12 of the 26 sub-group levels also recorded price increases for some of the items that fall in that level. These collective increases and decreases would account for the magnitude and direction of the current inflation rate. 1 of the 11 main expenditure categories recorded no price changes.
