

Antigua and Barbuda CONSUMER PRICE INDEX

Release date: 8 Jan 2020

May 2019

Inflation Rate

1.8%

Headline Inflation: Year-on-Year Changes for May 2019 compared to May 2018

The All Items Index increased 1.8% for the 12-months ending May, a slightly lower decrease than the 2.0% increase for the period ending April.

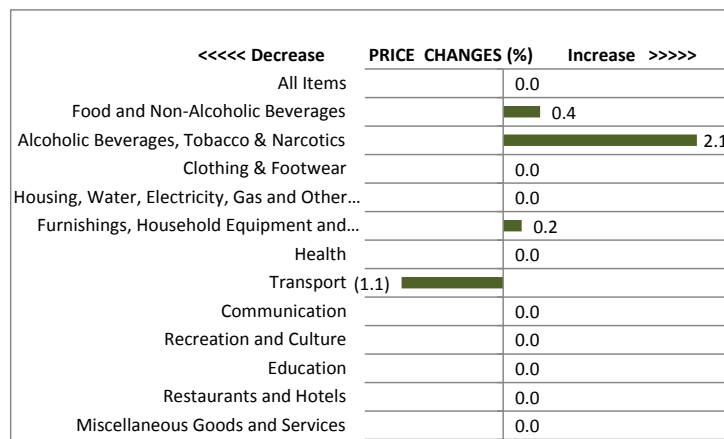

The Food Index increased 1.5% over the same period. Six of the nine major supermarket food groups indexes increased over the span with The Index for Vegetables (15.8%) rising the most. Two of its three sub-categories recorded increases. The Index for Fresh and Chilled Vegetables rose 18.8% and the Index for Fresh and Chilled Potatoes increased by 11.5%. The Index for Frozen, Preserved or Processed Vegetables declined by 2.8%. The Index for Fish and Seafood recorded the second largest increase of 13.8%. The Index for Fresh, Chilled or Frozen Fish and Seafood increased by 18.9% and the Index for Preserved or Processed Fish and Seafood rose 8.5%.

The Index for Non-Alcoholic Beverages increased 3.7% in May.

The All Items Less Food and Energy Index increased 2.0% over the past 12 months with most of the major component indexes rising. The Clothing and Footwear Index remained unchanged at 7.0% in May. The Index for Furnishings, Household Equipment and Routine Household Maintenance increased by 5.4%, a slight increase over the April increase of 5.2%. The Index for Transportation rose 5.6%, this was attributed to increases in the Indexes for Purchase of Vehicles and Transportation by Air. The Index for Restaurant and Hotels remained unchanged.

The Energy index remains unchanged at 0.0%.

Month-to-Month Changes for May 2019 compared to Apr 2019

The Monthly Consumer Price Index for the month of May was unchanged.

The Food and Non-Alcoholic Beverages Index increased 0.4%. The Food Index rose 0.5% with an array of increases and decreases. The Index for Fruits was the largest contributor rising 3.6% in May, this was attributed to a 4.2% increase in the Index for Fresh or Chilled Fruit. The Index for Oils and Fats rose 1.2% over the same period. The Index for Fish and Seafood increased 1.1% with the Index for Fresh, Chilled or Frozen Fish and Seafood increasing by 1.75% after been unchanged the previous month. The Index for Vegetables rose 1.0% with the Index for Fresh or Chilled Potatoes increasing by 7.9% and the Index for Fresh or Chilled Vegetable rising by 1.2%.

The Index for Milk, Cheese and Egg declined for the second month in a row falling 1.1%. The Index for Sugars, Jam, Honey, Chocolate and Confectionery decreased by 0.8%.

The Index for All Items less Food and Energy decreased by 0.1%. The decrease was influenced by the decline in the Transport Index. The Index for Transport by Air decreased by 3.3%. However, the Index for Alcoholic Beverages, Tobacco and Narcotics increased by 2.1%.

Table 1: Examples of Goods and Services in the 2019-based Consumer Shopping Basket

Main Expenditure Categories	No. of Items	Example of Goods and Services for which prices are collected to calculate the inflation rate	Frequency of price collection
Food and Non Alcoholic Beverages	192	<i>Bread, cereals, milk, coffee, juices, meats, fruits,vegetables, sugar, water</i>	Monthly
Alcoholic Beverages, Tobacco & Narcotics	13	<i>Beer, stout, rum, vodka, wine,whisky,cigarettes</i>	Monthly
Clothing and Footwear	72	<i>Men’s pants, boys shorts, women’s dresses, brassieres, underwear, laundry services,footwear</i>	Quarterly
Housing, Water, Electricity, Gas and Other Fuels	13	<i>Rent paid, repairs and maintenance, water supply, electricity, LPG cooking gas</i>	Monthly,Quarterly
Furnishings, Household Equipment and Routine Household	82	<i>Appliances, sofas, mattress, dressing table, glassware; detergent</i>	Quarterly
Health	8	<i>doctor’s bill, medicines,vitamins</i>	Monthly
Transport	27	<i>cars, batteries, license, gasoline, tyres, airline fares,</i>	Monthly, Quarterly
Communication	6	<i>Cell phones, cell phone rates, internet rates</i>	Quarterly
Recreation and Culture	14	<i>Televisions, radio, computers, cable tv services, movie cinemas tickets</i>	Quarterly
Education	3	<i>School fees, exam fees</i>	Annual
Restaurants and Hotels	8	<i>Meal lunches, burgers, fried chicken, pizza, roti, accommodation</i>	Quarterly
Miscellaneous Goods and Services	28	<i>Hair cuts, manicure pedicure, saloons, body lotion, toothpaste, shampoo, jewellery</i>	Monthly, Quarterly
Total number of goods and services in the basket	466	Prices are collected from the second Monday to the second Thursday of every month	
¹ Outlets refer to the businesses where prices are collected (e.g supermarkets). The same outlets are used for Food and Non-Alcoholic Beverages, Alcoholic Beverages, Tobacco & Narcotics and some Miscellaneous Goods and Services			

What is the Consumer Price Index?

The Consumer Price Index (CPI) is a statistical indicator of changes in the general level of prices of consumer goods and services purchased by private households. The CPI measures price movements of a fixed quality and quantity of goods and services. The mix of these consumer goods and services comprising the CPI are referred to as a “shopping basket.” In constructing this “shopping basket”, the selected goods and services are organised first by commodity type. They are then divided into sections, then sub-groups and then assigned to a major expenditure category. The Antigua and Barbuda CPI has 26 sections, 30 sub-groups and 11 major categories.

What is the Base Period?

The base period (base year) is the time period that is used as a reference point for measuring the price change of goods and services. The base period for the Antigua and Barbuda CPI is January 2019.

The base period index is represented as 100.0. (Usually presented as 2001 = 100). So for instance, if the April 2010 CPI for chicken legs is 167.1, then it means that the price for chicken legs has gone up by 67.1% since 2001. Similarly, if the January 2010 CPI for bread is 93.1, then the price of bread has dropped by 6.9% compared to its price in 2001.

What is Inflation?

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given amount of money. There are three expressions of price changes:

- year-on-year (*the inflation rate*)
- month-to-month
- annual average (or annualised average)

The annual average CPI is derived by summing the CPI for each month of the year and dividing by 12.

What are Weights?

Weights can be considered in the same way we would express how much we spend on various goods and services each month. Just like a monthly salary can be broken down as 20% on rent, 25% food, 15% mortgage, 10% on utilities and so on, the CPI weights are a collective expression of how households would generally spend their monthly income on goods and services.

The weights for this series of CPI were drawn from a survey of a sample of households in 2006 (the base period). Each household was asked to keep a record of their expenditure for one month. Once completed, the expenditures were added to determine the pattern. This pattern is what is referred to as the weights.

The current weights assume that each month, households would spend the most on *Accommodation* (218.3) followed by *Food* (214.2) and *Transportation and Communication* (153.5). Households would also spend the least on *Alcoholic Drink and Tobacco* (1.6).

Index Points Contribution

Contribution of each expenditure category (category weight over All Items weight) to the All Items index points change.

Year-on-Year	$\frac{\text{June 2010 CPI} - \text{June 2009 CPI}}{\text{June 2009 CPI}} \times 100$
Month-to-Month Price Changes	$\frac{\text{June 2010 CPI} - \text{May 2010 CPI}}{\text{May 2010 CPI}} \times 100$
Annualised Inflation Rate	$\frac{\text{Average 2010 CPI} - \text{Average 2009 CPI}}{\text{Average 2009 CPI}} \times 100$

The compilation of the CPI and the calculation of the inflation rate involve the processing of hundreds of price quotations. The Statistics Division wishes to acknowledge the cooperation of the business community in supplying the required prices and accommodating the Statistical Officers on their premises.

Table 3: Distribution of Changes in the Inflation Rate

	No. of categories	No. of Decreases	No. of Increases	No. of No Changes
May 2019 compared to May 2018				
Main Expenditure Level	12	2	9	1
Sub Group Level	23	4	13	6
Section Level*	12	4	8	0
Apr 2019 compared to Apr 2018				
Main Expenditure Category Level	12	2	9	1
Sub Group Level	23	4	13	6
Section Level*	12	4	8	0
May 2019 compared to Apr 2019				
Main Expenditure Level	12	1	3	8
Sub Group Level	23	2	4	17
Section Level*	12	3	5	4

**Section Level is 33 Sections however for comparative purposes between 2019 and 2018 data we are utilizing 12 section levels*

Table 3 outlines the distribution of price movements for four inflation periods:

- May 2019 compared to May 2018
- Apr 2019 compared to Apr 2018
- May 2019 compared to Apr 2019

In May 2019 compared to May 2018, 2 of the 12 main expenditure categories recorded price decreases, while 9 recorded price increases. 13 of the 23 sub-group levels also recorded price increases for some of the items that fall in that level. These collective increases and decreases would account for the magnitude and direction of the current inflation rate. 1 of the 12 main expenditure categories recorded no price changes.
